Metropolis

A modern beamer theme

Introduction
The **METROPOLIS** theme is a Beamer theme with minimal visual noise inspired by the hsrn Beamer Theme by Benjamin Weiss.

Enable the theme (in \LaTeX) by loading

\begin{verbatim}
\documentclass{beamer}
\usetheme{metropolis}
\end{verbatim}

Note, that you have to have Mozilla’s *Fira Sans* font and XeTeX installed to enjoy this wonderful typography.

In R you can of course use this package directly, see its documentation.
Sections group slides of the same topic

## Elements

for which **METROPOLIS** provides a nice progress indicator ...
Title formats
Metropolis title formats

Metropolis supports 4 different title formats:

- Regular
- SMALL CAPS
- ALL SMALL CAPS
- ALL CAPS

They can either be set at once for every title type or individually.
Elements
The theme provides sensible defaults to \texttt{emph}\{emphasize\} text, \texttt{alert}\{accent\} parts or show \texttt{textbf}\{bold\} results.

becomes

The theme provides sensible defaults to \textit{emphasize} text, \texttt{accent} parts or show \textbf{bold} results.
• Regular
• *Italic* (also *Italic*)
• **Small Caps**
• *Bold* (also *Bold*)
• *Bold Italic* (also *Italic*)
• **Bold Small Caps**
• Monospace
• Monospace *Italic*
• Monospace **Bold**
• Monospace **Bold Italic**
Lists

Items

• Milk
• Eggs
• Potatoes

Enumerations

1. First,
2. Second and
3. Last.

Descriptions

PowerPoint  Meeh.
Beamer  Yeeeha.
• This is important

Figure 1: Rotated square from texample.net.

This used a \LaTeX feature. All RMarkdown features are also at our disposal.
Table 1: Largest cities in the world (source: Wikipedia)

<table>
<thead>
<tr>
<th>City</th>
<th>Population</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mexico City</td>
<td>20,116,842</td>
</tr>
<tr>
<td>Shanghai</td>
<td>19,210,000</td>
</tr>
<tr>
<td>Peking</td>
<td>15,796,450</td>
</tr>
<tr>
<td>Istanbul</td>
<td>14,160,467</td>
</tr>
</tbody>
</table>

This used a \LaTeX{} feature. All RMarkdown features are also at our disposal.
Three different block environments are pre-defined and may be styled with an optional background color.

**Default**
Block content.

**Alert**
Block content.

**Example**
Block content.

The right side uses the `\metroset{block=fill}` option. Blocks can also used in Markdown using `###` (if slide-level=2).
\[ e = \lim_{n \to \infty} \left(1 + \frac{1}{n}\right)^n \]
Bar charts

Bar

Foo

<table>
<thead>
<tr>
<th>Bar</th>
<th>1</th>
<th>1.5</th>
<th>2</th>
<th>2.5</th>
<th>3</th>
<th>3.5</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>lorem</td>
<td>20</td>
<td>24</td>
<td>25</td>
<td>22</td>
<td>23</td>
<td>20</td>
<td>15</td>
</tr>
<tr>
<td>ipsum</td>
<td>18</td>
<td>23</td>
<td>24</td>
<td>21</td>
<td>22</td>
<td>18</td>
<td>13</td>
</tr>
<tr>
<td>dolor</td>
<td>5</td>
<td>10</td>
<td>15</td>
<td>12</td>
<td>13</td>
<td>5</td>
<td>3</td>
</tr>
</tbody>
</table>

Note: The chart shows the distribution of three categories (lorem, ipsum, dolor) across different values of Foo.
Veni, Vidi, Vici
Some references (Knuth, 1992; Graham et al., 1989; Simpson, 2003; Erdős, 1995; Greenwade, 1993)

allowframebreaks is not used or needed, also changed \cite to \citep, and defaulted natbib to option [round].
Conclusion

Source and documentation for the RMarkdown variant are at

Sometimes, it is useful to add slides at the end of your presentation to refer to during audience questions.

The best way to do this is to include the \texttt{appendixnumberbeamer} package in your preamble and call \texttt{\appendix} before your backup slides.

\textbf{METROPOLIS} will automatically turn off slide numbering and progress bars for slides in the appendix.

Calling \texttt{\appendix} currently leads to an error in when using \texttt{binb}.
The following code generates the plot on the next slide (taken from `help(bxp)` and modified slightly):

```r
library(stats)
set.seed(753)
bx.p <- boxplot(split(rt(100, 4),
                 gl(5, 20)), plot=FALSE)
bxp(bx.p, notch = FALSE, boxfill = "lightblue",
   frame = FALSE, outl = TRUE,
   main = "Example from help(bxp)"
)
A simple `knitr::kable` example:

```r
knitr::kable(mtcars[1:5, 1:8],
              caption="(Parts of) the mtcars dataset")
```

**Table 2: (Parts of) the mtcars dataset**

<table>
<thead>
<tr>
