‡ These authors contributed equally to this work.

Version March 4, 2021 submitted to Water

1 **Simple Summary:** A Simple summary goes here.

2 **Abstract:** A single paragraph of about 200 words maximum. For research articles, abstracts should
3 give a pertinent overview of the work. We strongly encourage authors to use the following style of
4 structured abstracts, but without headings: 1) Background: Place the question addressed in a broad
5 context and highlight the purpose of the study; 2) Methods: Describe briefly the main methods or
6 treatments applied; 3) Results: Summarize the article's main findings; and 4) Conclusion: Indicate
7 the main conclusions or interpretations. The abstract should be an objective representation of the
8 article, it must not contain results which are not presented and substantiated in the main text and
9 should not exaggerate the main conclusions.

10 **Keywords:** keyword 1; keyword 2; keyword 3 (list three to ten pertinent keywords specific to the
11 article, yet reasonably common within the subject discipline.).

12 1. Version

13 This Rmd-skeleton uses the mdpi Latex template published 2019/02. However, the official
14 template gets more frequently updated than the 'rticles' package. Therefore, please make sure prior to
15 paper submission, that you're using the most recent .cls, .tex and .bst files (available [here](#)).

16 2. Introduction

17 The introduction should briefly place the study in a broad context and highlight why it is
18 important. It should define the purpose of the work and its significance. The current state of the
19 research field should be reviewed carefully and key publications cited. Please highlight controversial
20 and diverging hypotheses when necessary. Finally, briefly mention the main aim of the work and
21 highlight the principal conclusions. As far as possible, please keep the introduction comprehensible
22 to scientists outside your particular field of research. Citing a journal paper [1,2]. And now citing
23 a book reference Gujer [3]. Please use the command [2] for the following MDPI journals, which use
24 author-date citation: Administrative Sciences, Arts, Econometrics, Economies, Genealogy, Humanities,
25 IJFS, JRFM, Laws, Religions, Risks, Social Sciences.

26 3. Materials and Methods

27 Materials and Methods should be described with sufficient details to allow others to replicate
28 and build on published results. Please note that publication of your manuscript implicates that you

29 must make all materials, data, computer code, and protocols associated with the publication available
30 to readers. Please disclose at the submission stage any restrictions on the availability of materials
31 or information. New methods and protocols should be described in detail while well-established
32 methods can be briefly described and appropriately cited.

33 Research manuscripts reporting large datasets that are deposited in a publicly available database
34 should specify where the data have been deposited and provide the relevant accession numbers. If the
35 accession numbers have not yet been obtained at the time of submission, please state that they will be
36 provided during review. They must be provided prior to publication.

37 Interventionary studies involving animals or humans, and other studies require ethical approval
38 must list the authority that provided approval and the corresponding ethical approval code.

39 4. Results

40 This section may be divided by subheadings. It should provide a concise and precise description
41 of the experimental results, their interpretation as well as the experimental conclusions that can be
42 drawn.

43 4.1. Subsection Heading Here

44 Subsection text here.

45 4.1.1. Subsubsection Heading Here

46 Bulleted lists look like this:

- 47 • First bullet
- 48 • Second bullet
- 49 • Third bullet

50 Numbered lists can be added as follows:

- 51 1. First item
- 52 2. Second item
- 53 3. Third item

54 The text continues here.

55 All figures and tables should be cited in the main text as Figure 1, Table 1, etc.

Figure 1. This is a figure, Schemes follow the same formatting. If there are multiple panels, they should be listed as: **(a)** Description of what is contained in the first panel. **(b)** Description of what is contained in the second panel. Figures should be placed in the main text near to the first time they are cited. A caption on a single line should be centered.

Table 1. This is a table caption. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data

56 This is an example of an equation:

§ (1)

57 Example of a theorem:

58 **Theorem 1.** *Example text of a theorem.*

59 The text continues here. Proofs must be formatted as follows:

60 Example of a proof:

61 **Proof of Theorem 1.** Text of the proof. Note that the phrase ‘of Theorem 1’ is optional if it is clear
62 which theorem is being referred to. □

63 The text continues here.

64 5. Discussion

65 Authors should discuss the results and how they can be interpreted in perspective of previous
66 studies and of the working hypotheses. The findings and their implications should be discussed in the
67 broadest context possible. Future research directions may also be highlighted.

68 6. Conclusion

69 This section is not mandatory, but can be added to the manuscript if the discussion is unusually
70 long or complex.

71 7. Patents

72 This section is not mandatory, but may be added if there are patents resulting from the work
73 reported in this manuscript.

74 **Acknowledgments:** All sources of funding of the study should be disclosed. Please clearly indicate grants that
75 you have received in support of your research work. Clearly state if you received funds for covering the costs to
76 publish in open access.

77 **Author Contributions:** For research articles with several authors, a short paragraph specifying their individual
78 contributions must be provided. The following statements should be used “X.X. and Y.Y. conceive and
79 designed the experiments; X.X. performed the experiments; X.X. and Y.Y. analyzed the data; W.W. contributed
80 reagents/materials/analysis tools; Y.Y. wrote the paper.” Authorship must be limited to those who have
81 contributed substantially to the work reported.

82 **Conflicts of Interest:** Declare conflicts of interest or state ‘The authors declare no conflict of interest.’ Authors must
83 identify and declare any personal circumstances or interest that may be perceived as inappropriately influencing
84 the representation or interpretation of reported research results. Any role of the funding sponsors in the design of
85 the study; in the collection, analyses or interpretation of data in the writing of the manuscript, or in the decision
86 to publish the results must be declared in this section. If there is no role, please state ‘The founding sponsors
87 had no role in the design of the study; in the collection, analyses, or interpretation of data; in the writing of the
88 manuscript, an in the decision to publish the results’.

89 Abbreviations

90 The following abbreviations are used in this manuscript:

91 MDPI Multidisciplinary Digital Publishing Institute
DOAJ Directory of open access journals
92 TLA Three letter acronym
LD linear dichroism

93 **Appendix A**

94 *Appendix A.1*

95 The appendix is an optional section that can contain details and data supplemental to the main
96 text. For example, explanations of experimental details that would disrupt the flow of the main text,
97 but nonetheless remain crucial to understanding and reproducing the research shown; figures of
98 replicates for experiments of which representative data is shown in the main text can be added here if
99 brief, or as Supplementary data. Mathematical proofs of results not central to the paper can be added
100 as an appendix.

101 **Appendix B**

102 All appendix sections must be cited in the main text. In the appendixes, Figures, Tables, etc.
103 should be labeled starting with 'A', e.g., Figure A1, Figure A2, etc.
